

CACI

NON SURGICAL SOLUTIONS

ULTIMATE

SKIN HYDRATION

The CACI Hydrotone facial combines active micro-current hydratone rollers with a unique, electrically conductive hydro smoothing gel mask infused with powerful hydrating properties.

This treatment recharges and replenishes the bio-electrical energy within the facial muscles to increase hydration and achieve extra firming.

The rollers gently massage the face, the mask becomes charged so that the face is bathed with rejuvenating energy whilst improving lymphatic drainage. This gives the face softer, radiant and more youthful appearance.

The action of the rollers over the Hydro Mask drives the gel properties deeper into the skin tissue, quenching de-hydrated skins and in particular, mature and environmentally damaged skin.

The CACI (Computer aided Cosmetology Instrument) is the result of 20 years research by the pioneer of microcurrent therapy, Dr Thomas Wing. This revolutionary range of treatments have been acclaimed by the international media as probably the most exciting beauty treatments of the last decade.

Progressive results are achieved through a course of treatments. But for optimum effect the Hydratone treatment works fantastically when combined with the CACI non-surgical face lift. Please discuss your individual requirements with your therapist Laura to achieve the optimum result for you.
